Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-10, 12, 20, and 24-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Puskas (US 6,313,565).

Puskas teaches a method as claimed. See entire the reference, especially columns 3-7, 9, and 13-14 and Figures 6, 8b, 8c.

Response to Arguments

3. Applicant's arguments filed 02/03/04 have been fully considered but they are not persuasive. The applicants amended the claims to recite periodical application of the wave having a single oscillation frequency and argue that Puskas does not teach such application.

This is not persuasive because Puskas teach such concept. See cited part of the document, especially columns 4-6 and Fig. 6. It is noted that the claims are written using the language "comprising" and thereby do not exclude application of any other waves.

As to the claims requiring two different waves the applicants argue that Puskas does not teach such application. This is not persuasive because in contrast to the applicants' arguments the document teaches such concept. See the cited parts of the reference, especially columns 4-6, Fig. 6 and Figs 8a-b. As to the argument that Puskas does not teach reducing the vibration of the object: this is not persuasive, because

Puskas teaches that application of different waves reduces the intense cavitation region. See at least column 13, lines 29-34. Since the intense of the cavitation is reduced the vibration would also be reduced.

It appears that the applicants' arguments are more specific than the claims. If the applicants would like to discuss the teaching of the prior art and the claims with the examiner a request for the interview would be granted.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
